Honorable Michael K. Powell, Chairman
Federal Communications Commission
445 Twelfth St., S.W.
Washington, D. C. 20554

RE: WT Docket No. 02-55; Written Ex Parte Presentation

Dear Chairman Powell:

Peak Relay is the licensee of several Part 90, 800 Mhz. frequencies in San Diego County and provides service to over 225 different business in our area. Never have we caused any interference to any Public Safety licensee in our fifteen years of operating 800 Mhz. systems. We strongly believe that the Commission must adopt a method to mitigate harmful interference that other operators are causing to Public Safety in sporadic areas of the country. This method should avoid undue disruption to innocent licensees such as ourselves, and that targets the problem's cure.

Interference is a local issue and cannot be solved by applying blanket solutions. Therefore, we wish you to note our strong opposition to Nextel's mandatory rebanding proposal and register our support of the competing Balanced Approach proposal that was put forth in this proceeding by a coalition of the United Telecom Council, Small Business in Telecommunications and others. Motorola recently filed a technical response to FCC Chief, Edmond Thomas' inquiry and it appears to support this position as well.

Please add our company to the list of those commentators that now support the Balanced Approach plan.

Sincerely,

Lori Baskins
President
